1.0 Introduction

Welcome to the 13Network. The 13Network is an Internet solution that allows outside parties to access information about the cases maintained on your system through the World Wide Web. This type of system provides an alternative to the Creditor Dial-In systems that many offices have maintained in the past. However, this type of solution provides many benefits over the current dial-in systems. Much of the work that is required to maintain the dial-in system has been eliminated and the number of people accessing the system is no longer limited to the number of modems connected to the machine. Also, other types of information can be disseminated to the creditor/attorney community by the pure nature of the web interface of the 13Network.

A 13Network.com membership gives trustee a personal homepage and the ability to view:

- Case
- Attorney
- Dates
- Plan Payments
- Summary
- Claims
- Receipts
- Payments
- Ledger
- Case Notes
- Breakdown
- Delinquency
- Calendar/Docket
- Status Report
- Claims Register

The following pages will be your user guide for 13Network.com.

If you require any assistance you may visit the web site for Tammy L. Terry at <http://www.det13.net/trac.shtml> for this documentation and contact information.

Welcome to the 13Network

Your Chapter 13 Information Management System®

The 13Network gives its users access to more than **2.5 million** Chapter 13 Bankruptcy cases. **2,000,000** users have accessed Trustee data since October 2000.

The 13Network is a service hosted by [Bankruptcy Software Specialists, LLC](#). BSS is the nation's leading provider of Bankruptcy Software and Services to Chapter 13 Trustees. Click [here](#) to learn about other services provided by BSS.

Trustees - BSS can host your data on the 13Network even if BSS is not your Chapter 13 software provider! It's easy! [Click here to learn how!](#)

Chapter 13 Case Information contained on this website is not intended for public display. You **must** obtain authorization from the Trustee before accessing the Trustee data. Please contact the Trustee's office for more information.

Chapter 13 Bankruptcy Services on the Web

If you are looking for data from a Trustee that is not on this site contact the trustee and request that they participate in the 13Network. Easy for you - easy for them!

NATIONAL DATA CENTER
CHAPTER 13 BANKRUPTCY CASE INFORMATION

Creditors seeking specialized access to Trustee information can look at the [Chapter 13 National Data Center](#). The [National Data Center](#) is a pay site sponsored by the National Association of Chapter 13 Trustees.

13Network Participating Trustees		Sort by Trustee Name	
Alabama	Philip A. Geddes (Decatur)	Robert A. Brothers (Indianapolis)	Oklahoma John Hardeman (Oklahoma City)
	John C. McAleer III (Mobile)	William Griffin (Kansas City)	Oregon Fred Long (Eugene)
	Curtis C. Reding (Montgomery)	Jan Hamilton (Topeka)	Pennsylvania Ronda Winnecour (Pittsburgh)
Arkansas	Joyce Bradley Babin (Little Rock)	Beverly M. Burden (Lexington)	Puerto Rico Alejandro Oliveras Rivera (San Juan)
	David D. Coop (Little Rock)	William W. Lawrence (Louisville)	José R. Carrión (San Juan)

Enter User ID
and Password
Then Click the
Login Button

2.0 User Views

The following screens are what the user will see when they log into your database.

This screen is where they will choose how they want to access information. If the user already knows the case number they can simply type it in where it says Case Number – Equals - <BLANK>. If they want to display a list of cases that meet a certain criteria they can choose different options here, also.

When the user clicks on the “GO!” button they are then presented with a list of the cases that meet their criteria. The user can click on the Case Number and go directly to that case. They will then see the following screen.

2.1 Case Information Screen

The case information screen allows the user to view pertinent information about a specific case. This screen provides the following information:

- Case Summary
- Debtor Information
- Attorney, Trustee, and Clerk Summaries
- Case Dates and Times
- Special Case Codes and Comments
- Case Notes
- Links to Debtor Employer Information
- Graphical Images of Receipts

3.0 Troubleshooting Login Access

The latest version of the 13 Network can block users from gaining access due to a number of reasons.

- Invalid user id and/or password combination
- Improper browser settings and/or version
- Privacy settings on personal firewall software

The following information will help you troubleshoot login failures for your authorized users.

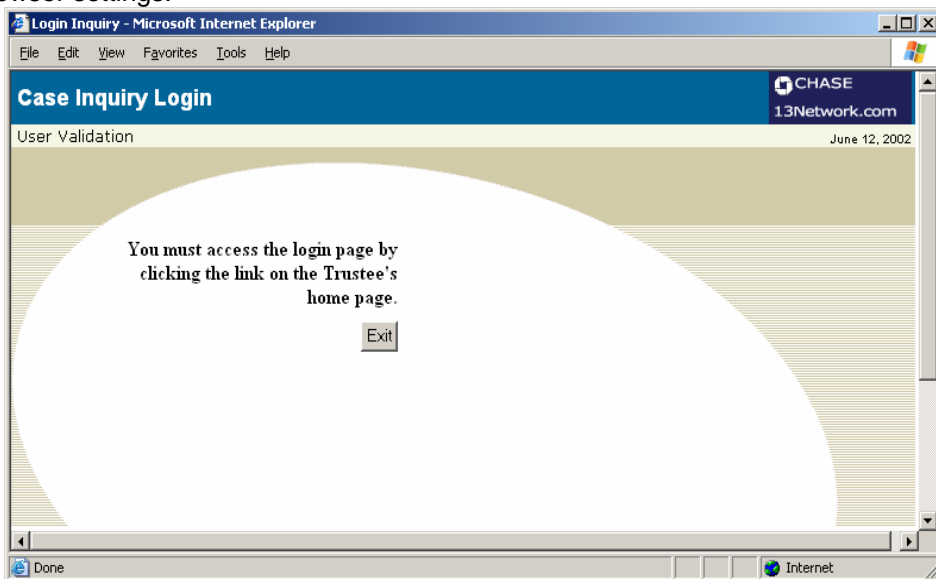

3.1 Invalid User ID and/or Password Combination

If a valid user is attempting to login to the 13 Network from the login screen then you should check if the user is entering the correct name and password. If the user verifies the user name and password but still cannot gain access, check to see if the user has “Caps Lock” turned on. This is a common occurrence for the majority of login problems.

3.2 Improper Browser Settings and/or Version

The 13 Network is best viewed at 800 X 600-screen resolution with version 4 or higher of the Microsoft Internet Explorer browser.

Users may experience problems accessing the login page in with Internet Explorer version 6 or higher due to browser settings.

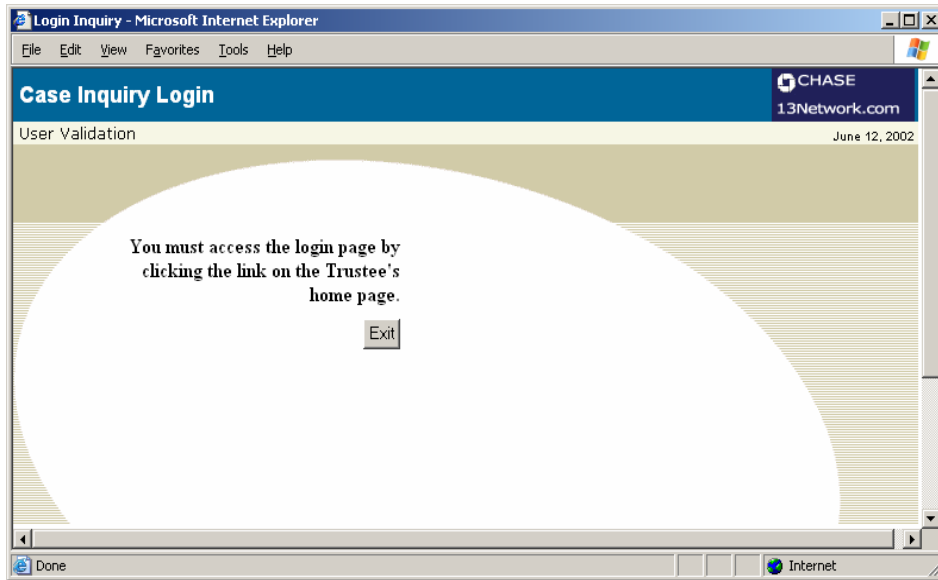

To correct this perform the following steps:

1. Open the Internet Explorer
2. Click **Help** and select **About Internet Explorer** to verify the user is on version 6 or higher. Close window.
3. Click **Tools** and select **Internet Options**.
4. Select the **Privacy** tab.
5. In the **Settings** section click the **Advanced** button.
6. Ensure the **Override automatic cookie handling** check box is **checked**.
7. Ensure both **First-Party Cookies** and **Third-Party Cookies** settings are set to **Accept**.

6.3 Privacy settings on personal firewall software

Problems accessing the login page from the Trustee's home page may also be caused by personal firewall software installed on the user's PC.

If the user has a personal firewall installed or has anti-virus software installed on their PC with a built in personal firewall; there are certain settings that must be disabled for them to access the 13 Network.

Norton Internet Security 2002 is such a product that will cause this error. In order to correct the user must:

1. Start **Norton Internet Security**
2. Select **Privacy Control**
3. Uncheck the box that reads **Enable Privacy**

Other types of personal firewalls have this setting as well. If a user is experiencing these errors then they must disable or adjust the privacy settings that are causing these errors.
